

What's NEW for 2012

New Product Lineup

This year we have some delicious, spicy, sweet and exciting new products that will make your business stand out! We listened to what you, our customers, want from your wholesaler. We eliminated some run-of-the-mill items and added unique products grown or made in New England.

Our Commitment to 'Local'

We understand the seasonal nature of business on Cape Cod because we live here too. We support small scale agriculture by purchasing fruit and vegetables from Cape Cod farmers. Our focus in 2011 is to provide you with additional items that are produced on or near Cape Cod; salad dressings, prepared foods, desserts and more. Our economy is driven by tourism and a 'local taste' is often requested. We offer a full line of local products for you to choose from to impress your customers.

Cutting-Edge Online Ordering System

We have upgraded our online ordering system to offer you the most advanced online ordering process ever. Powered by OneLink, web-ordering gives you the tools to make order management a breeze. Features of this high tech system include an online catalog, multiple order guides, product pricing, order history, invoice history and purchase order confirmations. You can place your orders online at your convenience!
